Raleigh, NC, USA | +1-919-946-3996 | ragil.mmdv653@gmail.com | [linkedin.com/in/ragil-mammadov](https://www.linkedin.com/in/ragil-mammadov) | U.S. Citizen

Experience

Prometheus Group

Raleigh, NC

Associate Software Developer (Full-Stack) | On-site, Full-time

Jun 2025 – Present

- Ship full-stack features across the Shutdown Turnaround Outage (STO) suite for Fortune 500 clients including Shell, BP, Saudi Aramco, Chevron, and Covestro.
- Deployed on-site to Covestro for a 3-week embedded engagement, resolving 30+ production tickets across bug fixes, feature delivery, incident triage, and PostgreSQL data integrity issues – cutting the client's open backlog by 80%.
- Designed C#/.NET microservices on PostgreSQL and engineered bidirectional SAP & Oracle Primavera P6 REST integrations, syncing enterprise planning and execution data across global turnarounds.
- Built and maintained a shared React + TypeScript component library, accelerating delivery and enforcing UI consistency across product teams.
- Contributed to GWOS AI – one of the first AI-driven solutions in the EAM/ERP space – developing ML pipelines that power planning, scheduling, and predictive insights.

Mr. ComfortRide LLC

Raleigh, NC

Software Engineer | Remote, Contract

Jan 2025 – May 2025

- Built and launched MrComfortRide.com, a luxury transportation booking platform in React, TypeScript, and Tailwind CSS featuring real-time pricing, driving an 18% lift in booking conversion.
- Developed a Python/Django driver management service backed by PostgreSQL, sustaining 99.9% uptime and automating driver onboarding, payout reconciliation, and trip analytics.
- Modeled SQL schemas, tuned query plans (40% latency reduction), and shipped GitHub Actions CI/CD for one-click, zero-downtime deployments.

Aurora LLC

Baku, Azerbaijan

Software Development Intern | On-site

May 2023 – Aug 2023

- Built and documented RESTful APIs in Node.js, using Azure DevOps for version control and Mocha for unit testing across core service logic.
- Collaborated with the data science team in an Agile/Scrum environment to integrate predictive ML models into the web application framework.
- Applied machine learning techniques to categorize user-generated content, achieving 85% classification accuracy.

Kohl's

Apex, NC

Technical Operations Associate (Amazon) | Part-time, On-site

Oct 2020 – Mar 2021

- Processed 150+ Amazon returns daily at 99% accuracy through Kohl's inventory system and Amazon Seller Central, operating barcode scanning, POS, and Amazon logistics platforms.
- Worked across the Kohl's-Amazon partnership using Amazon-integrated retail inventory software, data entry systems, and supply chain tracking tools.

Education

University of North Carolina at Charlotte

Charlotte, NC

B.S. in Computer Science, Concentration in Software Engineering – GPA: 3.6/4.0

Dean's List (4x), Chancellor's List (2x)

Technical Projects

WatchPort – Luxury Watch Portfolio Tracker | React, TypeScript, Python (Flask), Supabase, Tailwind

Apr 2025 – Jun 2025

- Built a web app for luxury watch collectors to track, value, and analyze collections against real-time market data, with automated valuation, ROI analytics, and Recharts-driven dashboards.
- Designed a Python/Flask backend serving REST endpoints for valuation, market-data ingestion, and portfolio analytics, with Supabase auth and PostgreSQL row-level security isolating user portfolios end-to-end.
- Crafted a responsive Shadcn UI + Tailwind interface (dark/light themes) and optimized the Vite build for fast cold starts.

Technical Skills

Languages: Java, Python, C#, TypeScript, JavaScript, SQL, C++ , Bash

Frontend: React, Next.js, Angular, Redux, Tailwind CSS, Material UI, Shadcn UI, React Aria, HTML5, CSS3

Backend: Java Spring Boot, ASP.NET / .NET, Python (Django, Flask), Node.js, Express, GraphQL, REST

Databases: PostgreSQL, SQL Server, MongoDB, SQLite, Supabase, Firebase

Cloud, DevOps & Security: AWS, Azure, Docker, Kubernetes, Rancher, Argo CD, GitHub Actions, CI/CD, Linux, Penetration Testing

AI/ML & Enterprise: TensorFlow, PyTorch, scikit-learn, NumPy, SAP S/4HANA, Oracle Primavera P6, Jira

Certifications

NVIDIA – Building RAG Agents with LLMs (2026)

Stanford University & DeepLearning.AI – Advanced Learning Algorithms (2025)

Stanford University & DeepLearning.AI – Supervised Machine Learning (2025)

Microsoft – Foundational C# (2025)
